DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

1. Claims 1-13, 89-90 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent NO. 6360888 to McIvor et al.

McIvor teaches a sensor with a substrate with notches cut in the substrate to form a neck down region in the substrate and a sensor electrode formed from conductive layer

wherein the notches cut in the substrate do not expose any sensor electrodes to analyses, further including a slotted needle having a slot. (figures 1-2, 13-15)

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent NO. 4543958 to Cartmell .

Cartmell teaches a sensor with a substrate with notches cut in the substrate to form a neck down region in the substrate and a sensor electrode formed from conductive layer wherein the notches cut in the substrate do not expose any sensor electrodes to analyses.

3. Claims 1-13, 89-90 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent NO. 5390671 to Lord et al.

Lord teaches a sensor with a substrate with notches cut in the substrate to form a neck down region in the substrate and a sensor electrode formed from conductive layer wherein the notches cut in the substrate do not expose any sensor electrodes to analyses, further including a slotted needle having a slot.

Response to Arguments

4. Applicant's arguments with respect to claims 1-13, 89-90 are have been considered but are most in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roz Maiorino whose telephone number is 571- 272-4960. The examiner can normally be reached on 9am-5:30pm.

Art Unit: 3763

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nicholas Lucchesi can be reached on 703-308-2698. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
